

Epson Projector Source Setup Guide

Oppo UDP-203

Epson Pro Cinema 4040, 6040UB

Home Cinema 5040, 5040UBe

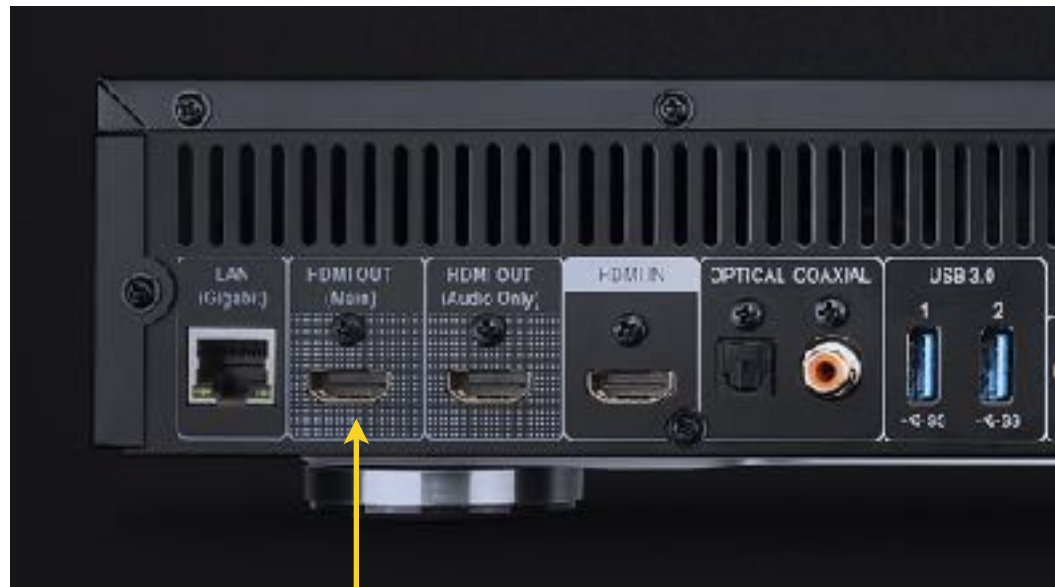

Oppo UDP-203 Setup Instructions

The Oppo UDP-203 will work out of the box, however, this guide will ensure you get the best image possible for both Blu-ray and UHD content when connected to an Epson Projector.

Step 1

Physical Connections

4K Capable (18Gbs)
HDMI Cable

- Connect the UDP-203 (HDMI OUT [MAIN]) to the Epson (HDMI INPUT 1) with a 4K capable HDMI cable

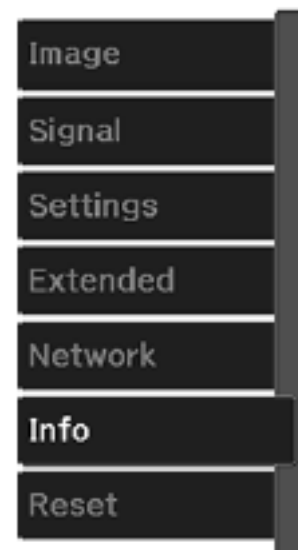

Step 2

Check Firmware Versions

- Guide written with Epson Firmware Version: 1.09/1.04 and UDP-203 Firmware Version: UDP20X-38-0222

Epson Firmware

- Using the Epson remote:
- Press [MENU] to bring up the On Screen Display
- Arrow [DOWN] to INFO
- Press [ENTER]
- Select [VERSION]
- The last 3 digits listed are the current firmware in the projector

- If you need to update the firmware:
- Google “Epson Projector Firmware Update” or go here: <https://epson.com/Support/wa00805>
- Find the latest update available for the Projector
- Before updating your firmware, carefully review the instructions using the "USB" or "Network" links listed next to the firmware version.

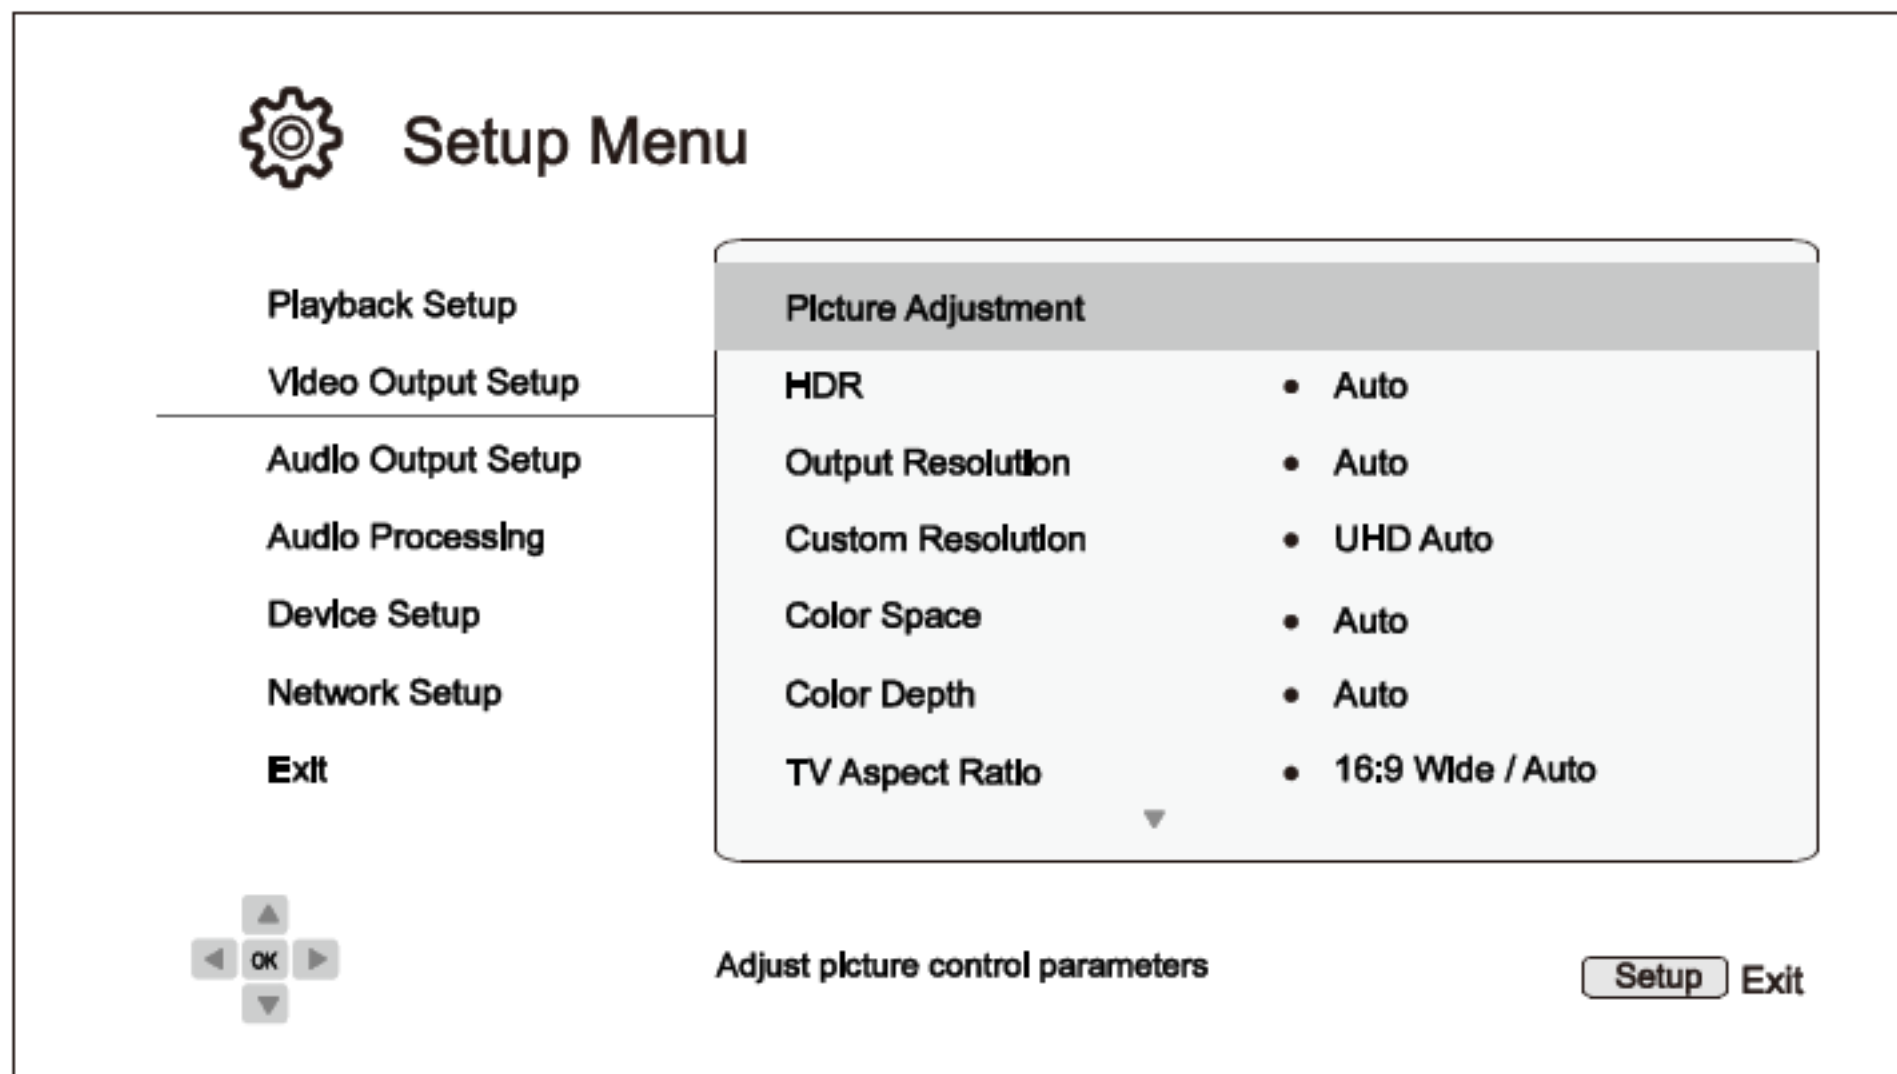

UDP-203 Firmware

- Using the Oppo remote, after it is connected to the internet
1. Press [SETUP]
 2. Navigate to “Device Setup”
 3. Select “Firmware Upgrade”
 4. Select “Via Network”
 5. Allow the process to complete

Step 3

Configure the UDP-203

- Using the Oppo remote: Press “Setup”
- Navigate to “Video Output Setup”

Step 3

Configure the UDP-203 (Cont.)

- Set each of the following options as follows:

- HDR: **AUTO**

- Output Resolution: **SOURCE DIRECT**

- Custom Resolution: **UHD AUTO**

- Color Space: **YCRCB 4:2:2**

- Color Depth: **12-BIT**

- TV Aspect Ratio: **16:9 WIDE / AUTO**

- 3D Settings:

- 3D Output: **AUTO**

- 2D->3D Depth: **8**

- 3D TV Size: {**diagonal of your screen**}

- DVD 24p Conversion: **OFF**

- De-interlacing Mode: **AUTO**

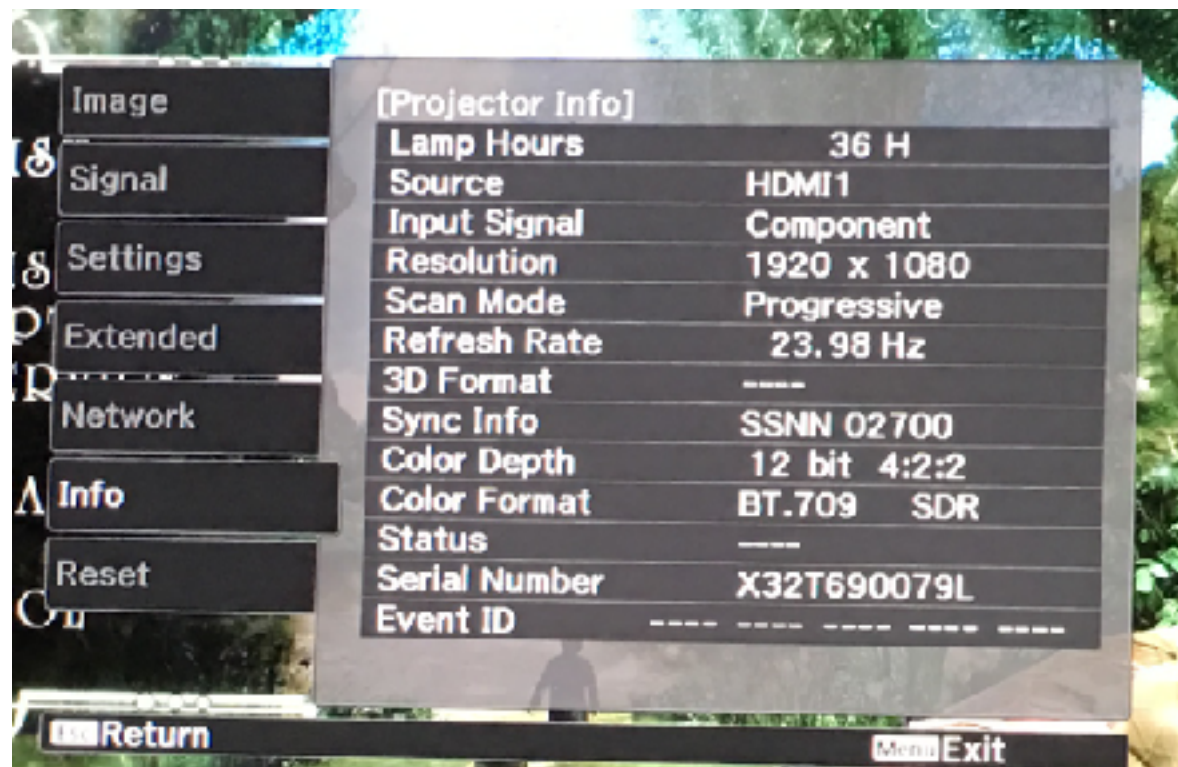

What this menu should look like

Step 4

Confirm Settings

- The final step is to reboot both the Oppo UDP-203 and Projector.
- See the screen shots below to verify everything is working properly.

When playing a Blu-ray Disc

When playing a UHD Disc

Maximum Performance Achieved

Your Oppo UDP-203 is now tuned for maximum video performance on your Epson 4040, 6040UB, 5040UB, or 5040UBe projector
